Tennessee Dental Safety Net Denture Program

According to a Harris poll conducted on behalf of the American Dental Association, more than one out of three low-income adults avoids smiling. This number is likely higher for Tennesseans as our state ranks among the bottom for oral health. Tennessee is one of only three states that do not offer dental benefits as part of Medicaid.

The Tennessee Dental Safety Net Denture Program provides low-cost dentures and partials to working-age Tennesseans (ages 18-64) by subsidizing a significant portion of the costs. The State of Tennessee funded the program for several years but had to cut funding in 2020 due to COVID-19 related budget shortages.

Through the Tennessee Dental Safety Net Denture Program, more than \$1.25 million has benefitted over 2,300 Tennesseans to date. In many cases, patients who received affordable dentures have gone on to live healthier lives and even get better jobs.

In 2018, the program lost a great champion, State Representative Charles Sargent, an advocate who served on the State's House Finance, Ways and Means Committee, but each Tennessee resident has an opportunity to help those suffering from serious challenges related to oral health. One way you can help is to contact your state elected officials and urge them to renew this program. They need to

recognize the value it brings to your community. Our dental professionals, in particular, are often in a position to bring this need to the attention of the public and are an authoritative source in this respect.

The Tennessee Dental Safety Net Denture Program is administered at no charge by Delta Dental of Tennessee's Smile180 Foundation and is available through many of the charitable dental clinics included in this guide.

Delta Dental of Tennessee believes this program is critical to the citizens of our state. For many of our fellow Tennesseans, poor oral health inhibits their ability to chew and speak properly, not to mention their self-confidence and the ability to smile for a job interview. Many of them lost jobs in 2020, so their need is even more critical, and while the charitable clinics across the state are doing their best to help, more funding is needed to help them fill in the gaps.

"The Tennessee Denture Program has helped thousands of our neighbors," says Delta Dental of Tennessee President & CEO, Phil Wenk. "Our mission is ensuring healthy smiles and we're committed to this mission and this program, and that's why we will be supplementing funding for it through June 30, 2021. It's important that we continue the progress of this program."

This guide is published by Delta Dental of Tennessee's Smile180 Foundation to help Tennesseans who cannot afford dental care. This publication offers a directory of free, low-cost and sliding-fee dental clinics located across the state.

East Tennessee

About the Clinics in This Guide

Most clinics in this guide serve community members who do not have dental insurance and cannot afford dental services at market rate prices. Many of these clinics rely heavily on volunteer dental professionals and support staff to offer dental services. Each of these health facilities has a unique process for screening payment ability and processing patients.

Although the clinics in this guide aim to offer timely care and meet the needs of all patients, high levels of demand and emergency health situations may cause long wait times. This is especially true for patients seeking non-emergency restorative and routine care (such as dentures or routine cleanings). Potential patients are strongly encouraged to contact more than one clinic to learn more about availability, payment options and wait times for services. Patients should expect to provide proof of income eligibility to receive care.

Types of Clinics

Free

Free Clinics provide services at no cost to patients who meet income eligibility requirements.

Federally Qualified Health Center (FQHC)

Federally qualified health centers (FQHC) are not-for-profit clinics that receive federal grants to offer sliding-fee-scale payment programs for patients who qualify.

Low Cost

These clinics offer dental services at prices that are lower than average market rates.

Sliding Fee Scale Clinics

Sliding fee scale clinics allow patients to pay for services on a "sliding" scale based on income limitations.

Beersheba Springs Medical Clinic

19592 SR 56

About the Information in This Guide

This dental resource guide contains information provided by the clinics listed. While reasonable effort has been made to include accurate and current information, Delta Dental of Tennessee and the Smile180 Foundation are not responsible for errors or omissions in the information. This guide is only intended to provide information to individuals and families and does not represent any recommendation, endorsement or warranty by Delta Dental or the Smile180 Foundation for any clinic listed herein or services provided by said clinics.

by Delta Dental of Tennessee

Helpful Steps for Getting Care:

Each clinic has a unique process for meeting the needs of patients. Using these steps will help clinics meet your needs in a more timely and efficient manner.

1 Call Before You Go: Calling clinics first and inquiring about the issues listed below will help you discover how to best get the care you need and deserve.

Things to ask about:

Eligibility: Most clinics in this guide offer services based on your income and where you live. Many clinics will require proof of income and address. Learning about eligibility requirements by phone can save time and money.

Availability of Services: Learning which services are available and if services have wait periods for processing or receiving care can help you select a clinic and time frame that meets your needs.

How to Make an Appointment: Although some clinics accept walk-ins, most clinics in this guide require an appointment prior to service. Some clinics may have specific procedures for appointment setting.

2 Explore Your Options: Contacting more than one clinic allows you to learn what options are available and what screening processes are required to receive care.

3 Make an Appointment: After deciding which clinic is right for you, contact the clinic and follow the clinic's procedures for making an appointment.

4 Get the Care You Need: After you make your appointment, follow the clinic's procedures for attending the clinic and receiving care. If you can't make your appointment, call or contact the clinic to reschedule or cancel your appointment. This will allow the clinic to meet the needs of other patients who are seeking care.

5 Follow Up: Prevent future dental problems by following the instructions given by clinic staff, attending follow up appointments, and practicing good oral hygiene at home.

About Delta Dental of Tennessee

Delta Dental of Tennessee is a not-for-profit dental benefits provider dedicated to advancing oral health care for Tennesseans through products, advocacy and philanthropy.

Currently, the company is the largest independent dental benefits provider in the state, with more than 2,000 employer groups representing over 1.2 million Tennesseans.

The company also has one of the state's largest networks of practicing, licensed dentists with more than 90% participating in our Delta Dental Premier™ network and more than 70% participating in Delta Dental PPOSM. Delta Dental of Tennessee uses this leverage to give back to the community through its Smile180 Foundation and partnerships with other charities dedicated to the health and well-being of Tennesseans.

About Delta Dental of Tennessee's Smile180 Foundation

At Delta Dental of Tennessee, our core mission is to ensure healthy smiles by improving the overall wellness of the people in the communities we serve through our products, advocacy, education and philanthropy. Founded in 2015, the Smile180 Foundation is a 501(c)(3) organization that is fully funded by Delta Dental of Tennessee. The foundation works to fulfill Delta Dental's mission by supporting dental education, children's hospitals and reduced-cost dental clinics and other like-minded charities in the state of Tennessee.

The Smile180 Foundation reflects the transformative power of a healthy smile to turn someone's life around. We believe a smile promotes confidence and is an essential part of a healthy, productive life. The foundation focuses giving back through three primary channels:

Dental Schools and Continuing Education

We are committed to helping Tennessee's future dentists receive the best education in the best facilities possible and supporting current dentists in learning cutting edge methods and procedures.

Children's Hospitals

When children are in the hospital, it's not always possible for them to receive the dental care they need. We help provide facilities that allow them to receive treatment without leaving the hospital.

Dental Clinics

The most at-risk members of our communities are least likely to receive the dental care they need. We support dental clinics, like those listed in this guide, that provide oral care to low income and underserved individuals and families.

For more information about the Smile180 Foundation please visit:

What Are Dental Health Events?

Dental health events aim to address the needs of areas with limited dental care providers. These events invite community members living in remote or underserved areas to meet at a designated date, time and location to receive health care. Events are typically hosted by volunteer-supported organizations and take place over several days. Community members interested in learning more about the next dental health event can contact the host organizations listed on this page.
